Digital technology is being incorporated in implant dentistry at a rapid pace. On both the planning side and the restorative side, digital options are available to improve efficiency, accuracy, and the patient experience with implants. Surgeons and restorative dentists alike can benefit from the technologies available.

## OBJECTIVES

- Overview of the role of the digital workflow in implant dentistry.
- How to gather digital data and set up the workflow in the planning stage.
- Plan for surgical guides, immediate provisional crowns, and anatomic healing abutments.
- Understand the restorative portion of the workflow, with the use of scanning abutments, emergence profile, and copy-milling.
- Troubleshooting methods in both the planning and restorative phase.
- How to optimize communication through the referral of patients.
